

AGAINST ALL ODDS

ALBERT MEGEE

WHAT ARE THE ODDS! Even after being told that he could not volunteer in a hospital setting because of medical ailments, Albert Megee continues to volunteer *Against All Odds!*

Seven years ago, after being diagnosed with leukemia, Albert was advised by his doctor to discontinue his volunteer service at the Rancocas Valley Hospital. The doctor felt that being in a hospital setting could cause further complications, as his immune resistance to other illness would be severely compromised.

Consequently, Albert turned to the Masonic Home of New Jersey, where he began volunteering three days a week and four hours a day transporting residents who live in the Alzheimer unit to physical therapy. Several years ago, Albert was again diagnosed. This time with Parkinson's disease. Today, Albert continues to volunteer 35 to 40 hours a month, successfully completing 3,100 hours of service.

Instead of being defeated and giving up, Albert's dedication, compassion and appreciation for life causes him to volunteer "*Against All Odds.*"
